Education

Monash University *Jan. 2024 – June 2027*
Bachelor of Computer Science (Mathematics Minor), WAM: 73.8, GPA: 3.000 *Clayton, VIC*

Viewbank College *Jan. 2019 – Dec. 2023*
Victorian Certificate of Education (VCE), ATAR: 90.15 *Rosanna, VIC*

Experience

Full-stack Engineering Intern *Jun. 2026 – Sep. 2026*
PlasmIT Vector *Docklands, VIC (Remote)*

- Assisted with the design and development of full-stack applications across frontend, backend and database components.
- Collaborated on implementation, testing and documentation across the software development lifecycle.
- Worked with the team to deliver features and resolve issues across the stack, following agreed development practices.

Web Developer *Mar. 2026 – Present*
Ocean Connect *Remote*

- Support the development, management and maintenance of Ocean Connect's website, keeping programme, event and community initiative information clear, accessible and up to date.
- Improve site structure and update content so volunteers and community members can easily engage with environmental education and citizen science initiatives.
- Apply web development skills to strengthen the organisation's digital presence and its mission of raising awareness about marine biodiversity and coastal conservation.

Project Coordinator *Aug. 2025 – Present*
Monash Assistive Technology Team (MATT) *Clayton, VIC*

- Lead collaboration with the academic supervisor to define project goals and strategies for developing low-cost tactile and refreshable Braille displays.
- Guide and coordinate project officers in brainstorming and developing accessibility technology.
- Conduct user interviews and design surveys to gather insights for user-centred development.
- Lead development of the React Native mobile application supporting the tactile display project.
- Received more than 90% positive feedback from team members for effective leadership and communication.

Operations Officer *Feb. 2026 – Present*
Monash Assistive Technology Team (MATT) *Clayton, VIC*

- Assist in the technical operations of MATT, supporting delivery of accessibility-focused projects.
- Collaborate with peers to ensure smooth execution of technical initiatives and internal processes.
- Contribute to the organisation's coordination, communication and operational workflows.

Projects Officer *Mar. 2025 – Aug. 2025*
Monash Assistive Technology Team (MATT) *Clayton, VIC*

- Collaborated with the academic supervisor and fellow officers to brainstorm accessibility solutions.
- Assisted in the design, development and testing of tactile display components for blind and low-vision users.

Projects

Skill-Issue (Skilliton) *Feb. 2026*
Next.js, TypeScript, Firebase, Genkit, Gemini, Tailwind CSS | GitHub | Live

- Built an AI-powered peer-to-peer skill exchange platform at UniHack 2026, enabling university students to find partners for skill swaps.
- Developed the full-stack application with Next.js, TypeScript and Firebase Authentication with Google OAuth support.
- Integrated an AI assistant using Google Genkit and Gemini for personalised skill recommendations and real-time chat.
- Implemented booking with Google Meet links and downloadable calendar events.

Trackie *Apr. 2026 – Present*
Next.js, React, TypeScript, dnd-kit | GitHub | Live

- Built a private, local-first workspace for tracking job applications from first save through to offer.
- Implemented a drag-and-drop Kanban board with dnd-kit, keeping all data stored locally in the browser.

Ressie *Apr. 2026 – Present*

React, Vite, JavaScript, LaTeX | GitHub | Live

- Built a local-first resume builder that turns structured form data into polished LaTeX.
- Added live preview and multiple templates, rendering LaTeX documents statically in the browser with JavaScript.

Inkboard *Sep. 2026 – Present*

TypeScript, Vite, IndexedDB, CRDT | GitHub | Live

- Built a local-first infinite canvas for handwriting, typed notes and PDF annotation.
- Stored data in the browser with IndexedDB and used a CRDT-based model for conflict-free state.

Personal Portfolio Website *Jan. 2025 – Present*

SvelteKit, JavaScript, CSS, VPS | p-jain.dev | GitHub

- Developed and maintain a SvelteKit portfolio website showcasing projects and technical skills.
- Built a responsive, accessible interface presenting shipped software, accessibility work and experience across web, mobile and hardware.
- Deployed the site on a virtual private server with custom domain configuration.

Pomodoro Timer App *Dec. 2025 – Present*

React Native, Expo, TypeScript | GitHub

- Developed a full-featured iOS productivity application using React Native and Expo.
- Integrated ambient sound playback, haptic feedback and multi-theme support.
- Designed modular components with file-based routing and persistent local storage.

Technical Skills

Languages: Haskell, Python, JavaScript, PHP, MySQL, R, TypeScript, HTML/CSS
Operating systems: Linux (Manjaro), macOS, Windows
Technologies: React Native, React, Next.js, Expo, Docker, Git, Arduino, MongoDB, Figma, VPS deployment, functional programming, statistical analysis

Certifications

Deloitte Australia Technology Job Simulation (2025)
Google Technical Support Fundamentals Certificate (Grade: 98.35%)
FreeCodeCamp Responsive Web Design Certification
