Education

Monash University

Jan. 2024 – June 2027
Clayton, VIC

Bachelor of Computer Science (Mathematics Minor), WAM: 73.8, GPA: 3.000

Viewbank College

Jan. 2019 – Dec. 2023
Rosanna, VIC

Victorian Certificate of Education (VCE), ATAR: 90.15

Experience

Full-stack Engineering Intern

Jun. 2026 – Sep. 2026
Docklands, VIC (Remote)

PlasmIT Vector

- Assisted with the design and development of full-stack applications across frontend, backend and database components.
- Collaborated on implementation, testing and documentation across the software development lifecycle.

Volunteer – Website Support & Management

Mar. 2026 – Present
Remote

Ocean Connect

- Support management and maintenance of Ocean Connect's website to ensure programme, event and initiative information remains accurate and accessible.
- Update and organise website content to improve navigation, clarity and usability for volunteers and community members.
- Assist in strengthening the organisation's digital presence to better communicate marine conservation initiatives and community programmes.

Operations Officer

Feb. 2026 – Present
Clayton, VIC

Monash Assistive Technology Team (MATT)

- Assist in the technical operations of MATT, supporting delivery of accessibility-focused projects.
- Collaborate with peers to ensure smooth execution of technical initiatives and internal processes.
- Contribute to the organisation's coordination, communication and operational workflows.

Project Coordinator

Aug. 2025 – Present
Clayton, VIC

Monash Assistive Technology Team (MATT)

- Lead collaboration with the academic supervisor to define project goals and strategies for developing low-cost tactile and refreshable Braille displays.
- Guide and coordinate project officers in brainstorming and developing accessibility technology.
- Conduct user interviews and design surveys to gather insights for user-centred development.
- Lead development of the React Native mobile application supporting the tactile display project.
- Received more than 90% positive feedback from team members for effective leadership and communication.

Projects Officer

Mar. 2025 – Aug. 2025
Clayton, VIC

Monash Assistive Technology Team (MATT)

- Collaborated with the academic supervisor and fellow officers to brainstorm accessibility solutions.
- Assisted in the design, development and testing of tactile display components for blind and low-vision users.

Projects

Skill-Issue (Skilliton)

Feb. 2026

Next.js, TypeScript, Firebase, Genkit, Gemini, Tailwind CSS | GitHub

- Built an AI-powered peer-to-peer skill exchange platform at UniHack 2026, enabling university students to find partners for skill swaps.
- Developed the full-stack application with Next.js, TypeScript and Firebase Authentication with Google OAuth support.

- Integrated an AI assistant using Google Genkit and Gemini for personalised skill recommendations and real-time chat.
- Implemented booking with Google Meet links and downloadable calendar events.

Trackie

Apr. 2026 – Present

Next.js, React, TypeScript, dnd-kit / GitHub

- Built a private, local-first workspace for tracking job applications from first save through to offer.
- Implemented a drag-and-drop Kanban board with dnd-kit, keeping all data stored locally in the browser.

Ressie

Apr. 2026 – Present

React, Vite, Node.js, Express, Tectonic / GitHub

- Built a local-first resume builder that turns structured form data into polished LaTeX.
- Added live PDF preview and multiple templates, compiling documents server-side with Tectonic.

Personal Portfolio Website

Jan. 2025 – Present

Web development, VPS / p-jain.dev / GitHub

- Developed and maintain a portfolio website showcasing projects and technical skills.
- Deployed the site on a virtual private server with custom domain configuration.

Tactile Display Project

Mar. 2025 – Present

React Native, hardware

- Contributed to an open-source project developing low-cost refreshable Braille displays for blind and low-vision users.
- Developed a React Native mobile application to interact with the tactile display hardware.
- Used Figma to develop mock prototypes and create an accessible companion website.

Pomodoro Timer App

Dec. 2025 – Present

React Native, Expo, TypeScript / GitHub

- Developed a full-featured iOS productivity application using React Native and Expo.
- Integrated ambient sound playback, haptic feedback and multi-theme support.
- Designed modular components with file-based routing and persistent local storage.

Technical Skills

Languages: Haskell, Python, JavaScript, PHP, MySQL, R, TypeScript, HTML/CSS

Operating systems: Linux (Manjaro), macOS, Windows

Technologies: React Native, React, Next.js, Expo, Docker, Git, Arduino, MongoDB, Figma, VPS deployment, functional programming, statistical analysis

Certifications

Deloitte Australia Technology Job Simulation (2025)

Google Technical Support Fundamentals Certificate (Grade: 98.35%)

FreeCodeCamp Responsive Web Design Certification
